'The MSc in Finance Programme is a dynamic Programme providing a wide range of professional courses in finance-related fields. The courses, enabling students to learn various financial tools and methodologies, are specifically designed to cater for students who would be prepared to get into the challenging financial world relating to the corporate and investment banking, the private equity side, insurance and securities business and accounting and finance segments. In addition to the above, the Programme has included a new course in FinTech which enables students to keep in line with the global financial markets in FinTech as it is getting very important.'
